

*The Great Mathematics of GXD
Through the efforts of Z*

that leonardo diVinci's trivium man by the way.

I will keep this short, simple and to the point Folks. This can indeed get confusing with the mathematics. Nevertheless, I think my Growth and Development peers would highly enjoy this.

This vast knowledge will shed light on our beloved six point star. It is more than K,W,U,L,L,L, or our newer points,it is far more than an emblem to commemorate our fallen king. THIS ONE SYMBOL MAKES UP THE VERY FABRICK OF LIFE MY FOLKS!! I will show you how amongst other things. I will also show you some very interesting things about the numbers 6,13 and 21.sit back and get ready to Develop ! Enjoy!

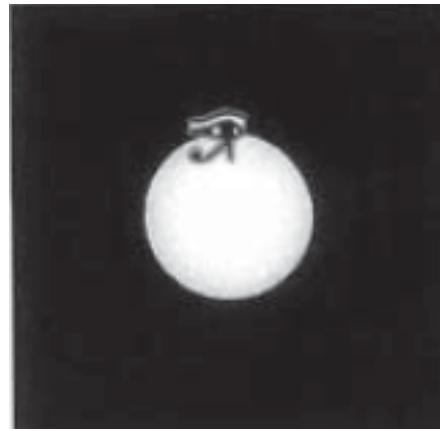

FIRST OFF.

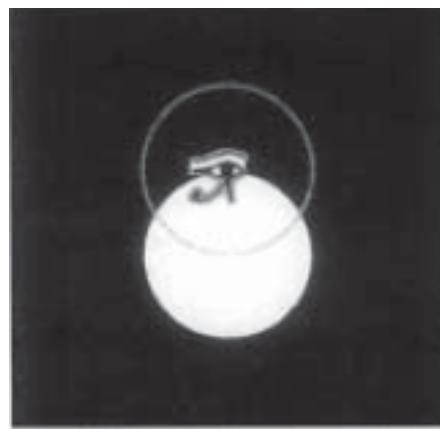

This is the FLOWER OF LIFE. Its in EVERYTHING folks,everything. Remember this symbol. Highly important!!

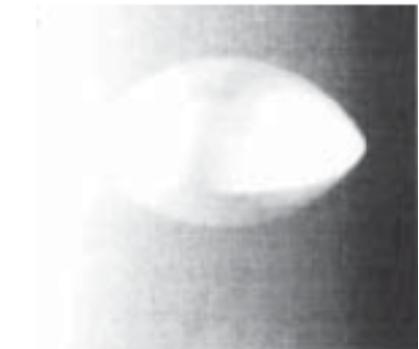

Now we've all seen this badass picture right? This is the symbol for spirit, the eye of Ra, or Horus Egyptian gods. We know in the beginning there was the holy spirit , correct? It created all, correct? Spirit can sit in the middle of its first creation for a long time, but eventually it'll make a decision to do something. To re-create this process, mystery school students were given instructions to reenact the same motions that spirit took. *Two simple instructions* are all that's required to create and complete everything in the entire universe. With that said,

this is where it is on day 1. just there being good 'ol holy spirit. But as we mentioned,it has to move upon itself.It has just made the first motion in Genesis: "And the spirit of God moved upon the face of the waters." And the very next thing was: "God said, 'Let there be light,' and there was light."this happens next.The first movement of Genesis.

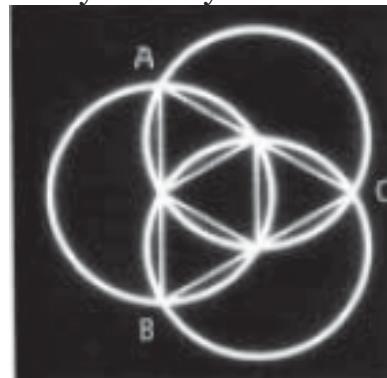

It moves unto itself,going up(or in any direction one radius away for that matter but lets just say up Folks). This creates the Vesica Pisces symbol. A very symbolical symbol used in modern religion. Any body gotta Jesus *ish on theyre car?the vesica pisces is what light is created from.here is without these circles below.

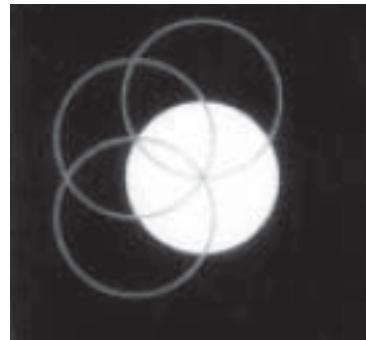

Moving on to the second movement of the spirit.

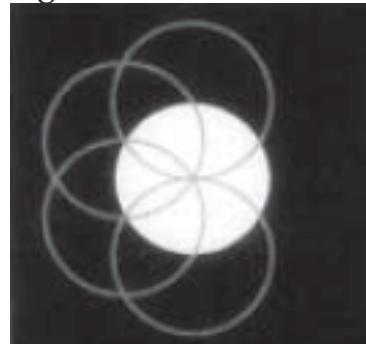

Moving exactly one radius away,youll get now 3 cicles.the second movement. It creates the next holy symbol, the holy trinity closer yall.

Now Folks you can research these holy symbols for yourselves to see just how long theyve been around,who uses them, and why. Ima keep strolln' tho.

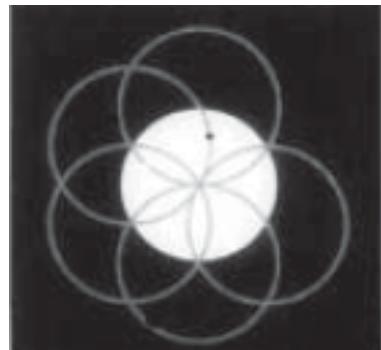

This image above is the 4th day of genesis.

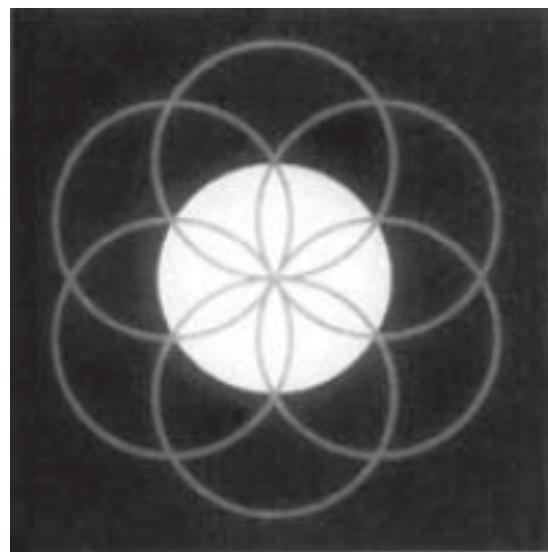

And fourth, not much goin on here except half of creation is finished. Almost there. Now any Gee that reads theyre bible like they should(not imposing on any religions

here guys) knows that the world was half finished on the 4th day.

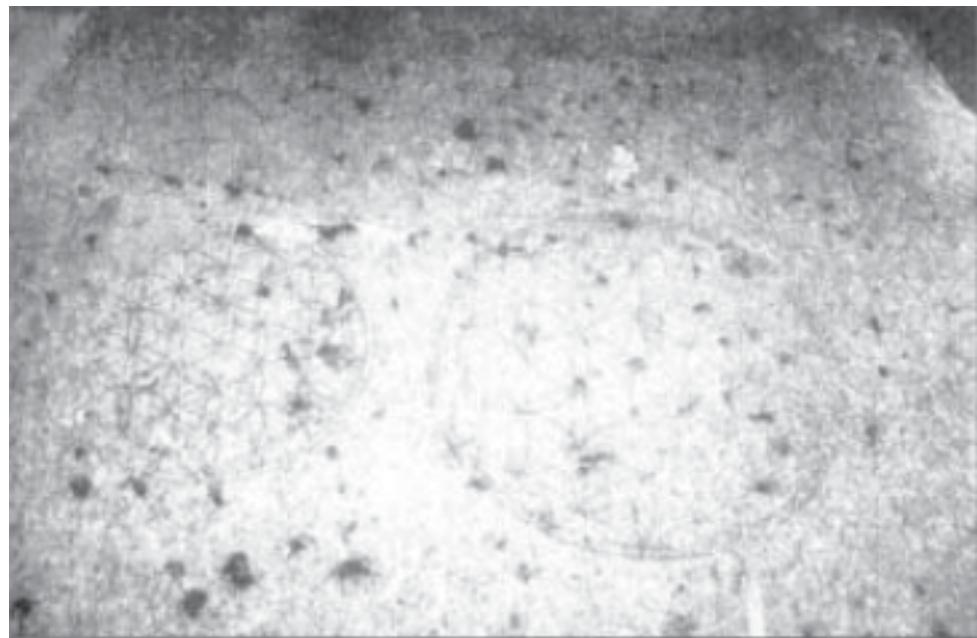

Heres the fifth receive more info.

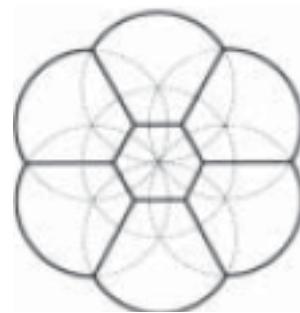

6.my favorite number and a few other folks out there.it holds the meaning to LIFE our first point.now the bible say the world was finished on the 6th day.why?look below.

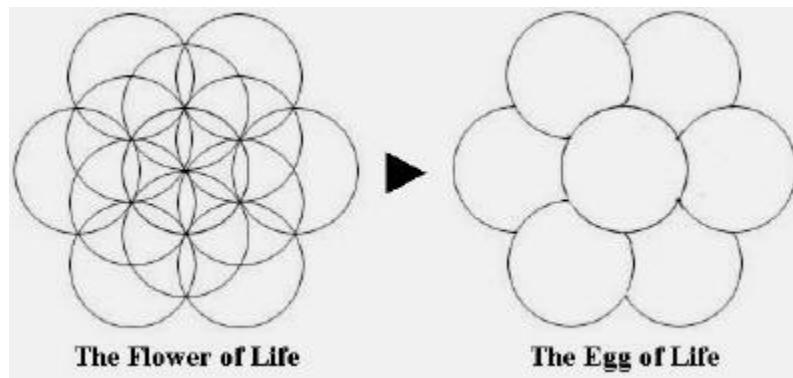

BAM!!!it is complete!in all its glory!!!! look at that.aint it beautiful?The Seed of Life!

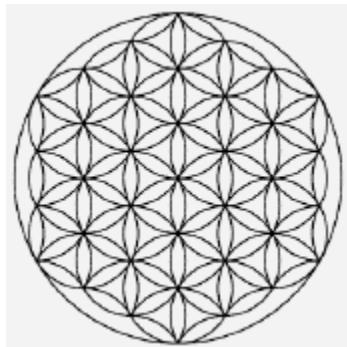

Found on cave walls, in the oldest pyramids, everywhere across the globe over 6000 yrs old.(howd they draw that geometrically perfect?)

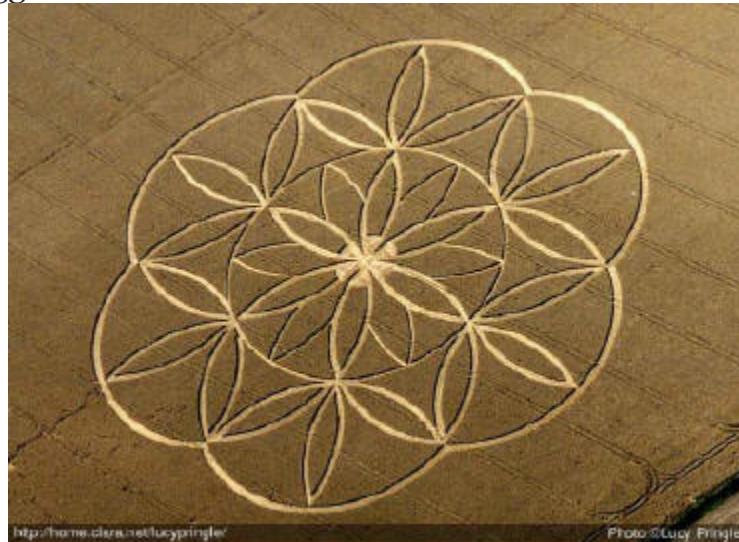

This is 3d.this also has a name.the Egg of Life.from Egg to Seed to the Flower of life you see below

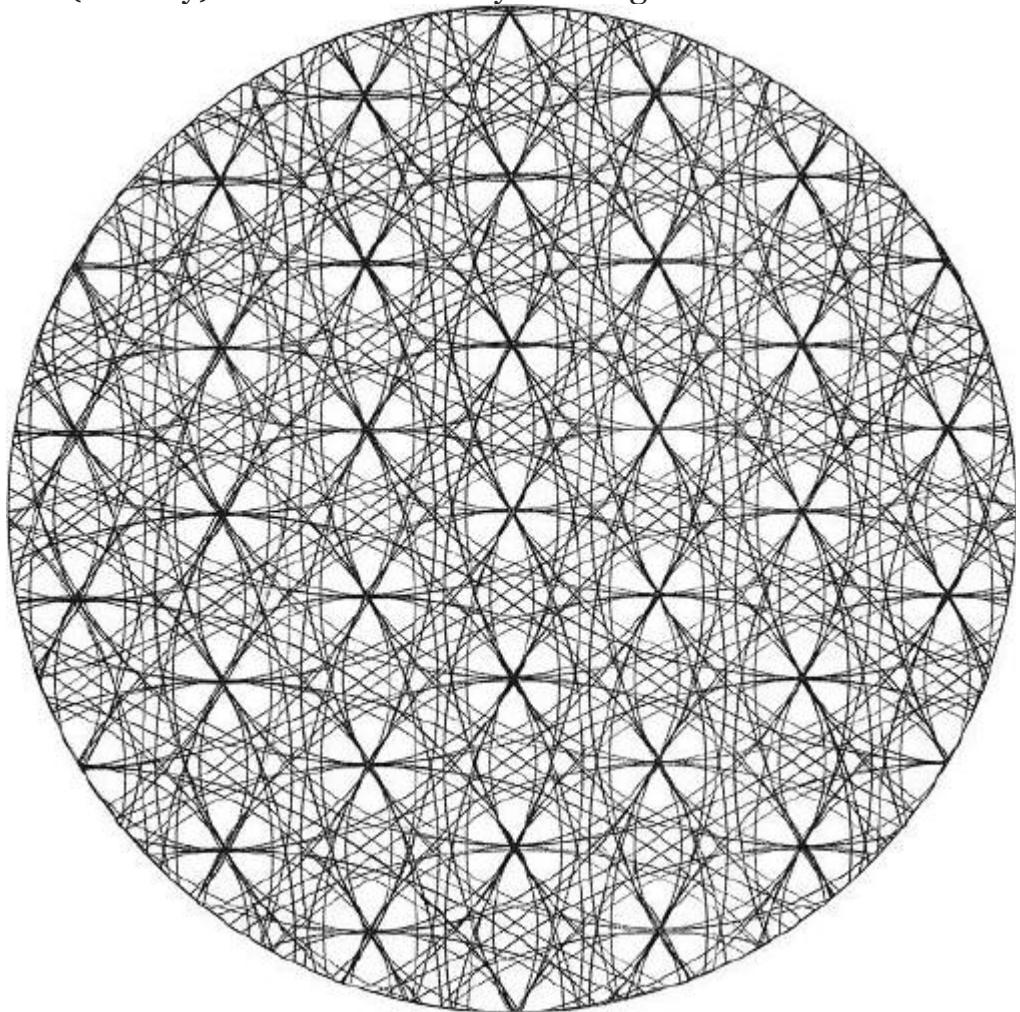

very important symbol it is. Mind blowing. BUT WAIT!!! I ain't done Folks. The flower of life holds a secret symbol created by drawing 13 circles out of the Flower of Life. By doing this, one can discover the most important and sacred pattern in the universe. This is the source of all that exists; it's called the *Fruit of Life*. It contains 13 informational systems. Each one explains another aspect of reality. Thus these systems are able to give us access to everything ranging from the human body to the galaxies. In the first system, for example, it's possible to create any molecular structure and any living cellular structure that exists in the universe. In short every living creature. I mean dont that "Egg" look like a atom? cummon.

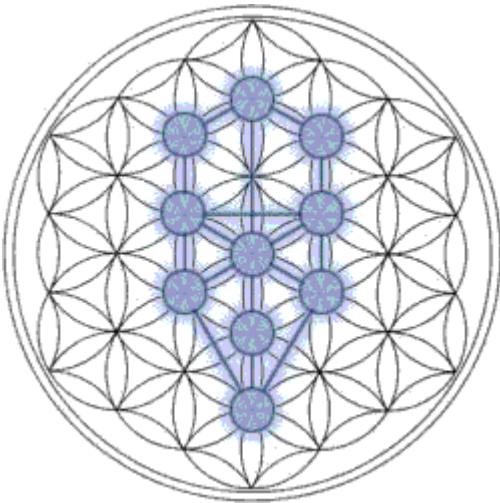

Its found everywhere from crop circles to holy spots.

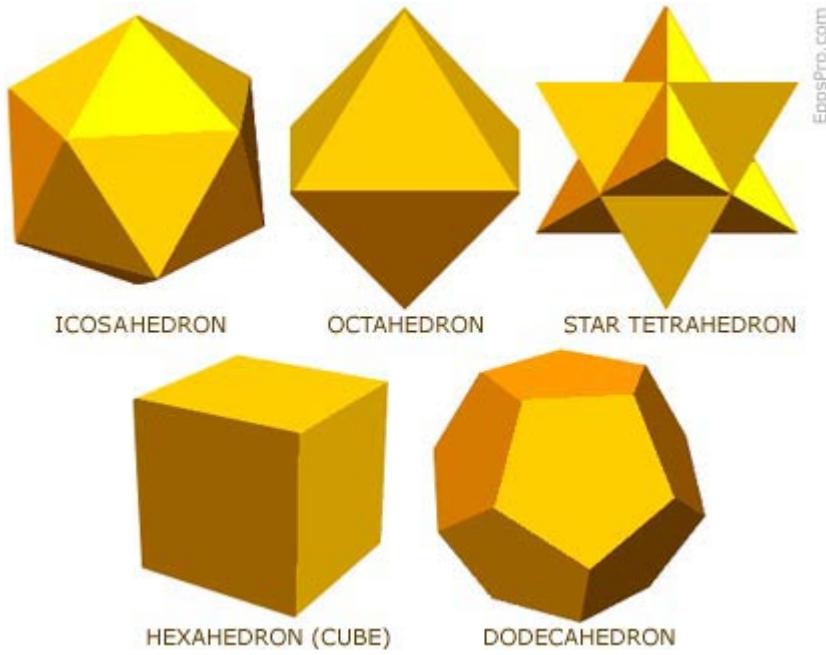

Its set in stone(literally) that this is the very building block of all life.

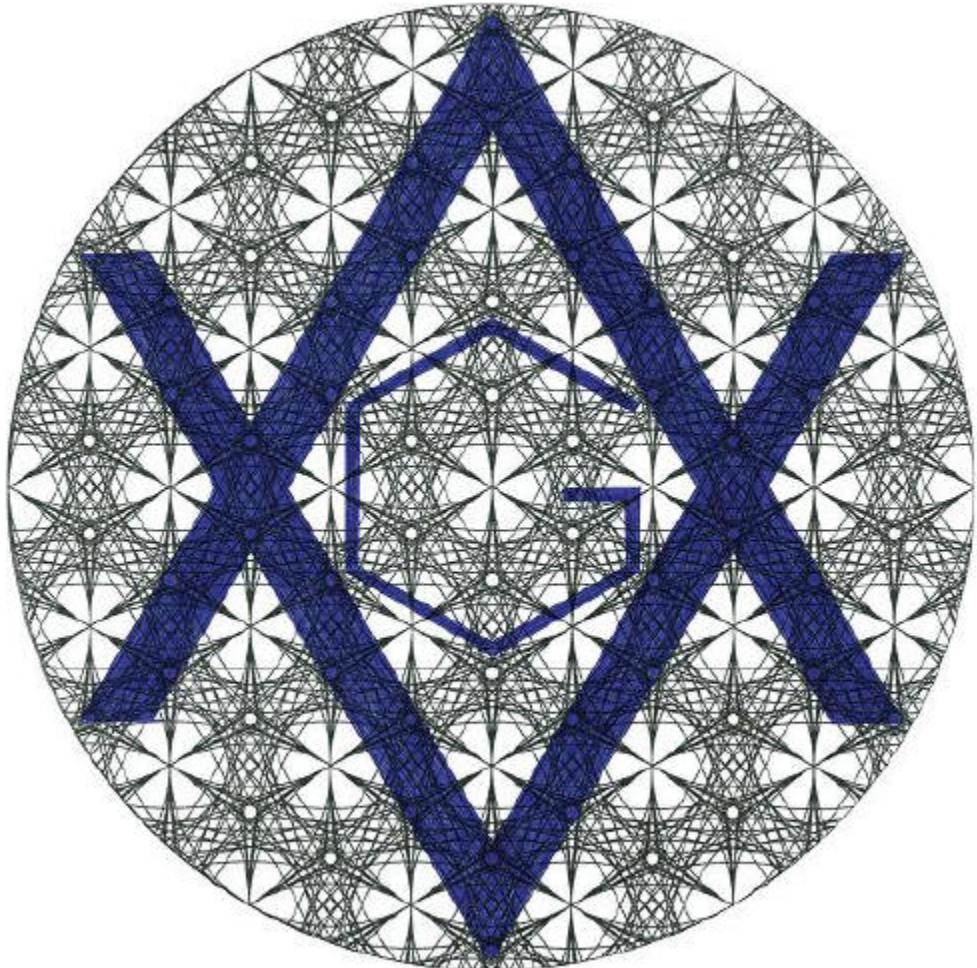

This is what it looks like when its complete.6s everywhere. Lemme show you something else.

The blue part is the jewish symbol for “the tree of life” I aint makn none of this up. look it up.

These are the basic platonic shapes. ALL derived from the flower.

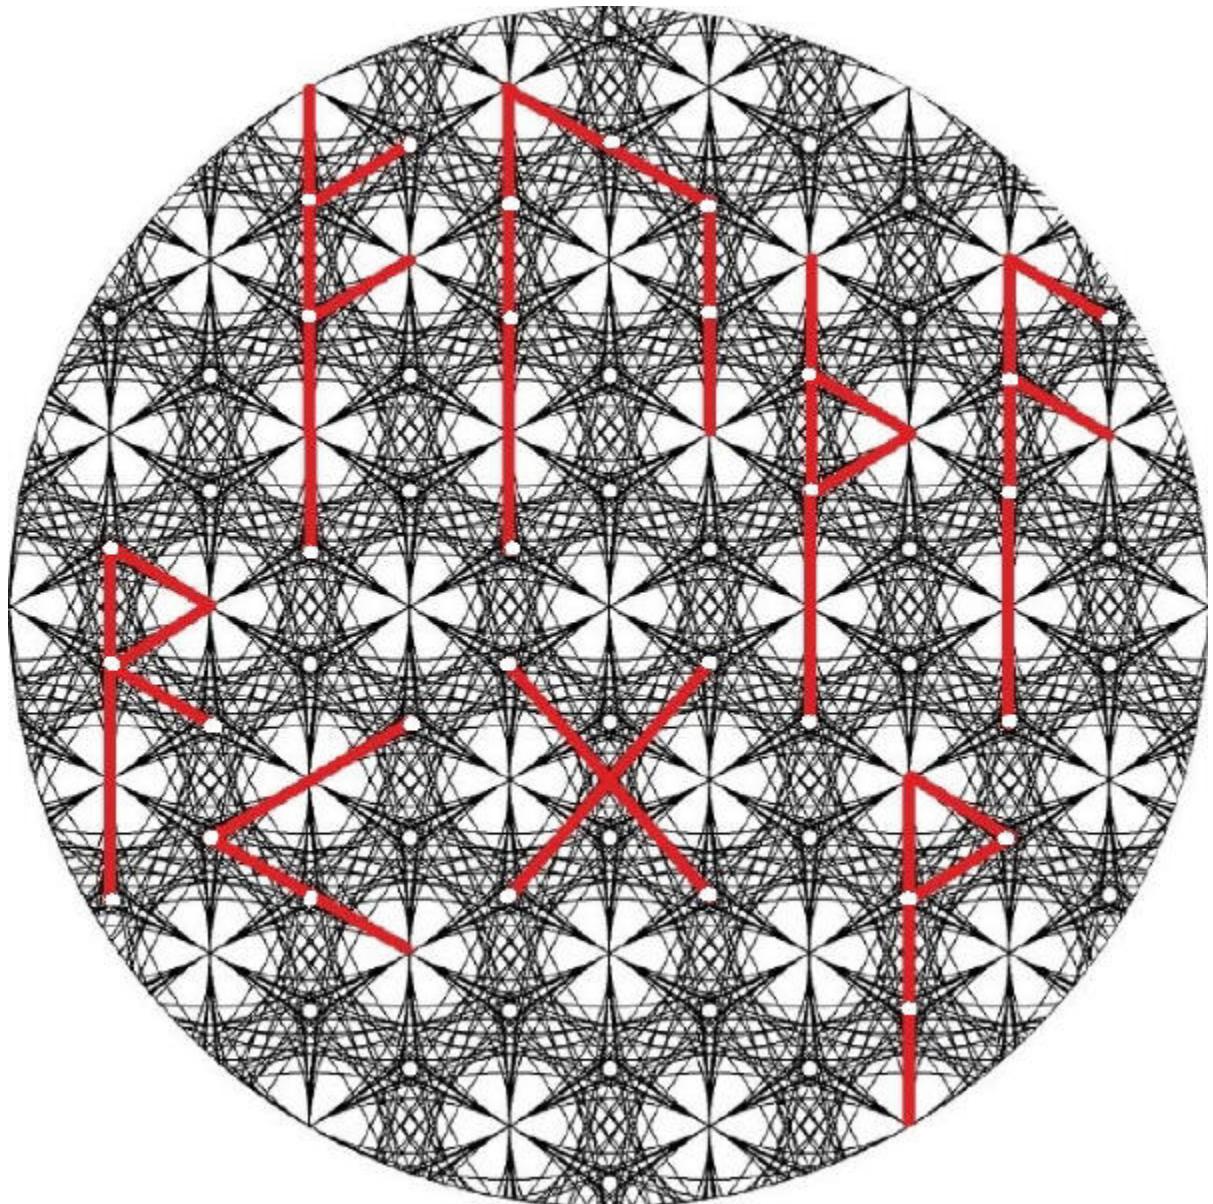

BAM!

This look familiar? the masonic symbol has 6 points and a G in the middle. Made of a compass(that weird tool in math class u draw circles with) and a SQUARE (a ruler). Geuss how to perfectly draw the flower of life? WITH A COMPASS AND SQUARE!!(if you wish to know more about the masons contact me,its far too much to go into right now,but trust me,ill make another document completely outlining not they're secrets (cause thats just wrong) but a lot of helpful info that us Folks can utilize)

moving on.

	Fehu is the rune of wealth		Eiwaz is the rune of Yggdrasil, it is powerful protection against
	Uruz is the rune of health, strength, vigor, and healing.		Pethro is the rune of fate or Örlög (destiny)
	Thurisaz is Thor's rune it stands for protection.		Elhaz is the Valkyrie rune it is the rune of protection from evil.
	Ansuz is the rune of the Gods, the gods of the ancestral Norseman.		Sowilo is the rune of Victory.
	Raido is the rune of physical journeys.		Tiwaz is the rune of justice and just balance.
	Kenaz is the rune of fire and physical passion.		Berkano is the rune of the Mother Goddess.
	Gebo is the rune of Gifts, either those given or born with.		Ehwaz is the mystical horse to which one makes spirit journeys on.
	Wunjo the rune of joy and wishes,		Mannaz is the rune of man.

Old Phoenician letters

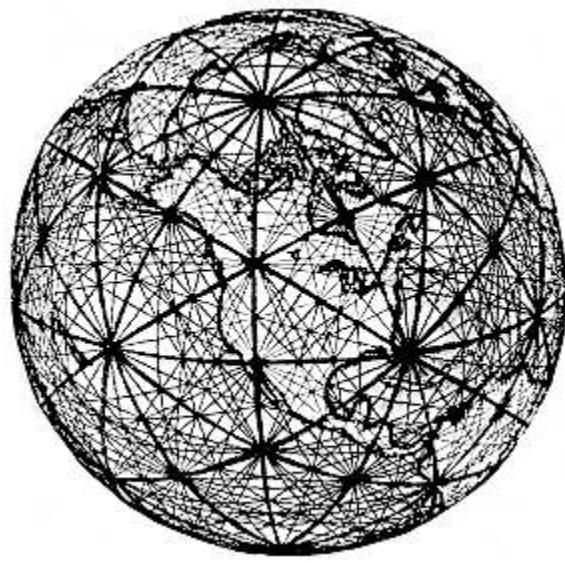

it gets deeper yall

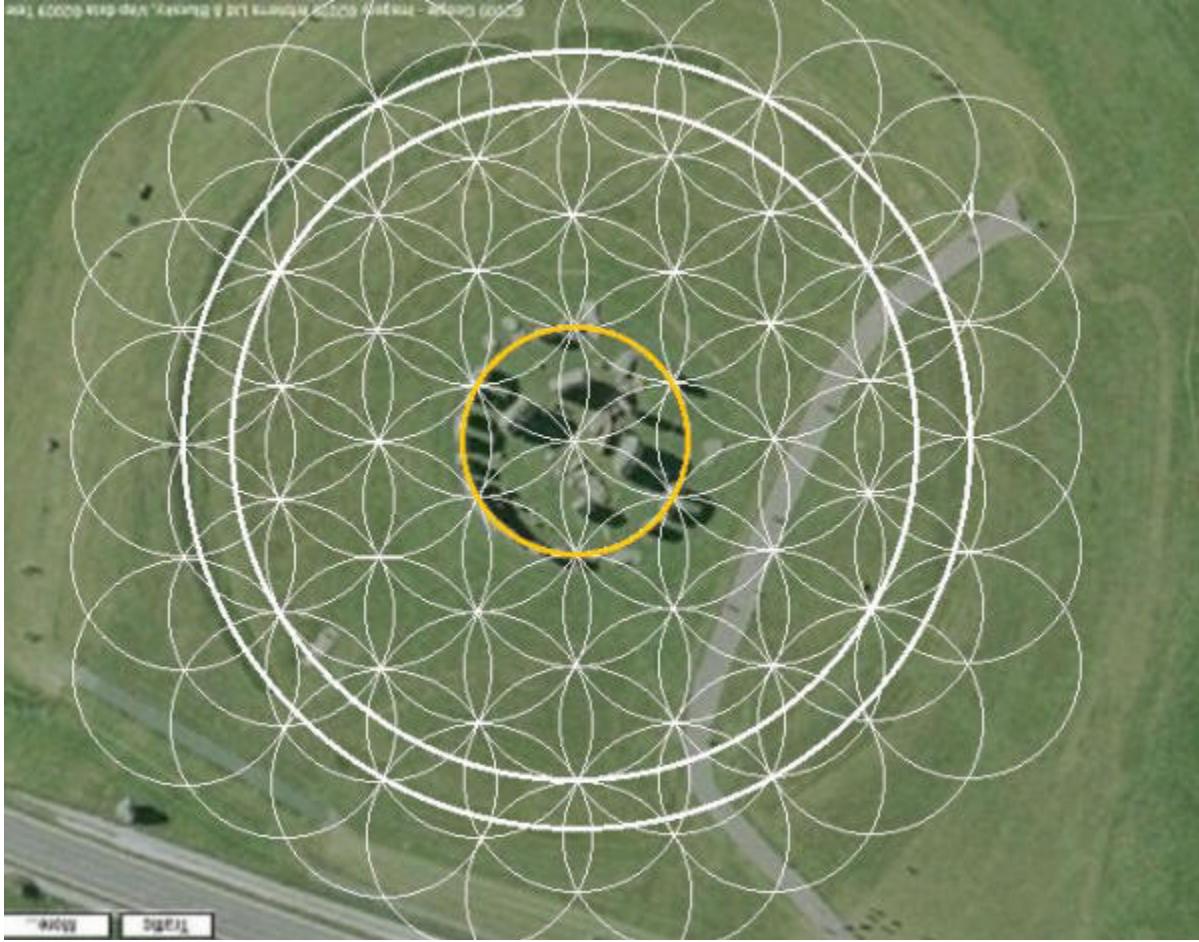

holy symbols, and holy spots on earth.here see...

The complete flower of life does have another use. If you overlay a map (after getting the correct scale) with the complete flower of life, all sacred sites, standing stones etc, will sit at the centre of six points. This picture gives you idea how the grid looks

the pyramids, and other various sacred spot all over the world perfectly fit longitude and latitude on the 6 points. still not convinced Folks? look at stone henge here

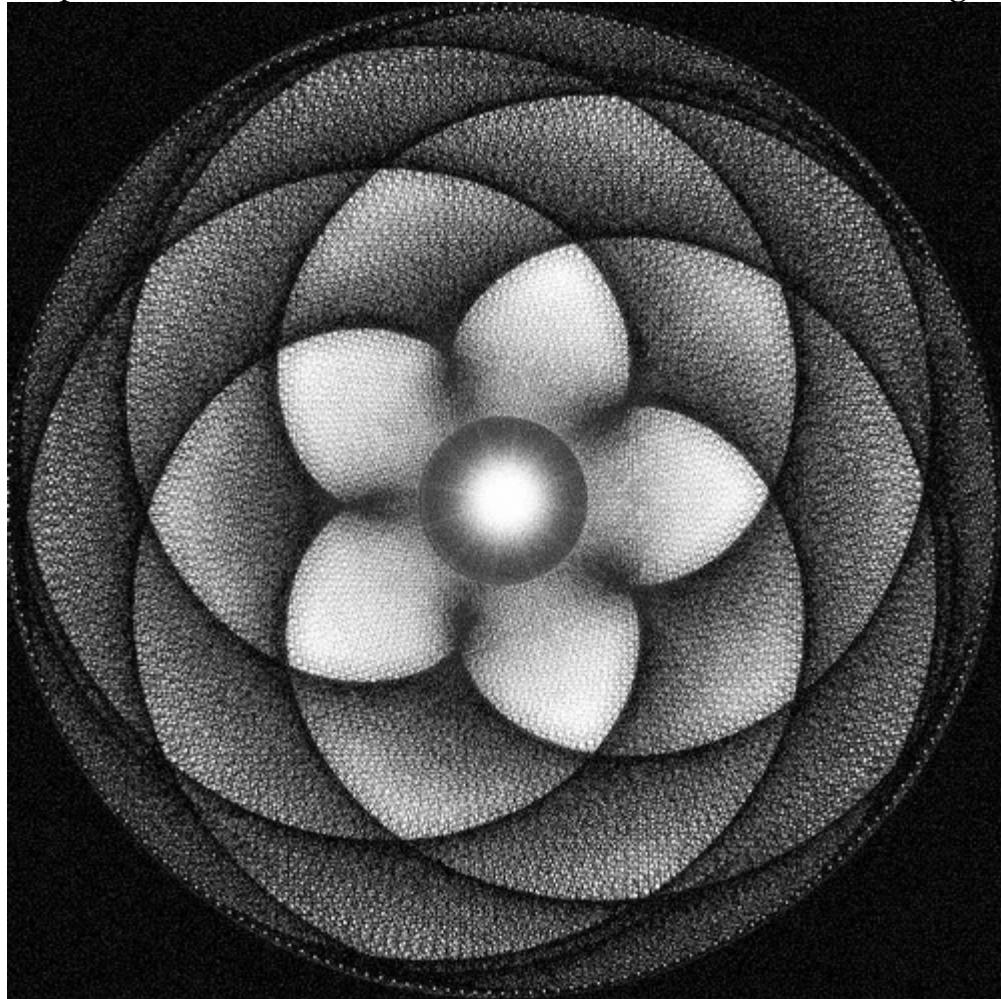

the stones are perfectly on the 6 points.

The image below has been made by hand with help of computer software for drafting. First, let's draw a square and two circles so one fits inside a square and the other outside the square. Strangely this represents accurately proportions of the orbits of

Venus and Earth.

Second, let's draw equally spaced points on each circle representing number of days per orbit (365 points for the orbit of the Earth and 225 points for the orbit of Venus). Next, let's connect lines between orbital positions of each planet for each day - picking for the starting point a day when both planets are closest to each other. After repeating this process for 8 orbits of the Earth the lines form this amazing image:

This image (to scale) shows dance of Venus and Earth - each of the fine lines connects both planets over time

required to complete 8 orbits by Earth (and 13 orbits by Venus). Orbit of Earth is cropped out.Creepy huh.

$$13+8=21$$

now I could go on and on about 13 and 21 but ill jus save that for next time.Ill be studying more with you soon. For now,these Augusta Georgia streets is calln me. I leave you with this,knowledge is everywhere,its what you do with it Folks. Those who seek,guide them down this YBR we call life.

Disclaimer:NONE OF THIS KNOWLEDGE IS MADE UP BY ME,Z.THIS IS INFORMATION YOU CAN FIND IN A LIBRARY OR ONLINE.I JUST PREFERRED TO SHARE IT WITH MY FAM! LONG LIVE THE 6.PLENTY MUCH LOVE TO ALL WHO IS READING.
